Our Weight Loss and Management Philosophy

One of the keys to losing weight and keeping it off is maintaining muscle during weight loss. Why? Because muscle burns calories and is a major factor in your overall metabolism. If you lose muscle during weight loss, you lose a lot of your capacity to burn calories. That's exactly what happens to many people who lose weight, but later gain it all back. Keeping your muscle metabolism high makes it easier to lose fat and keep it off long term.

Centered on commonly available clean foods, considered the contemporary "Paleolithic diet" This program combines Paleo-style foods with nutrient balanced protein shakes and other nutrients to support metabolism, maintain muscle, burn fat, balance blood sugar, and control appetite and cravings. This comprehensive approach addresses common problem areas and makes it easier for most people to achieve and maintain successful, healthy weight loss.
