

Supporting Weight Management Efforts with Customized Solutions

Managing weight is an important part of maintaining a healthy, active lifestyle. Obesity is a growing problem throughout the country and can contribute to a variety of health problems. When exercise and nutrition alone are not achieving the desired results for your patient, a prescription preparation may provide assistance. Wells Pharmacy offers a wide range of compounded medications that can be used individually or in conjunction, as you see fit, to provide a patient specific program.

What are your Patients' Weight Management Needs?

Wells Pharmacy Network offers a customized medication list that includes the following:

hCG options in both Injectable and Rapid Dissolve Sublingual Tablets - hCG is a natural hormone that is produced by our bodies. It has many functions and is used to treat many medical conditions. It is the hormone that almost completely controls our metabolic functions.

Appetite Suppressant Capsules - Stimulate metabolism and send signals of satiation.

Vitamin/Amino Acid Injectables - Support fat metabolism, provide energy to the body and may inhibit free radicals through powerful antioxidant reinforcement.

Cellulite Control Cream & Gel - Targeted ingredients that support exfoliation and tightening of the skin.

Sleeping Aid Capsule - Blend of Magnesium, Theanine and Melatonin to support sleep.

Please alert your patients of possible serious allergic reactions, including but not limited to rashes, itching/swelling (especially of the face/tongue/throat), severe dizziness, trouble breathing; and advise them to reach out to their physician or a pharmacist.

The information provided herein is for reference only and is not to be relied upon as making any representation as to the efficacy of any particular formulations. The sample formulations described herein result from prescriptions previously ordered by professionals licensed to write prescriptions in their respective discipline. Nothing herein is intended to replace or influence the independent judgment of any licensed professional. Only your physician can determine whether a particular formulation is appropriate for a patient.
